The "APPROVED PRACTICE" in this Department is that all estimates concerning works where materials and machinery are required, are prepared obtaining quotations from the manufacturers of such materials and plant and submitted to Government for sanction and revised quotations are called for whenever found necessary and orders are placed with the approval of the Secretary, Public Works Department.

Government have already in Government Order No.G-17687 PP-11-19-183 dated the 2nd February 1920 have disposed of this question and I have only asked for permission to correspond direct with Messrs. J. Lyons and Company in connection with the materials which we buy through them.

DIARY NO.....

From

The Secretary to Government,

Public Works Department.

To

C.S.Balasundram Iyer, Esqr, B.A.,

Chief Secretary to Government,

B a n g a l o r e.

Sir,

Adverting to G.O.No.G.17687-90/P.P.11-19-183 dated the 2nd February 1920, authorising the Chief Electrical Engineer to make purchases of certain classes of machinery, stores etc direct from the manufacturers in Europe and Americal, I have the honor to forward herewith copies of the correspondence -

1.Letter No.2102 dated 14-8-1919 } noted in the margin
2.Letter No.48/819 dated the 4-2-20 } from the Chief Electrical Engineer requesting permission to place orders for miscellaneous materials direct with Messrs.Jeremiah Lyon & Co Government Agents in London. His request may be considered if there is no particular objection to it.

I have the honor to be,

Sir,

Your most obedient servant

R V Sundaram

For Secretary to Government,
Public Works Department.

P.N.S/23-2-20

Letter No.2104 dated 12th August 1919, from the Chief Electrical Engineer, to the Secretary to Government, Public Works Department.

With reference to Government Order No.G.419-69 P.P.11-19-1 dated 7th July 1919, I have the honor to inform you that foreign purchases made by this department fall into the following classes:-

1st Electrical Plant.,

2nd Hydraulic plant.

3rd Duplicate plant which must be supplied by the original supplier. This is mainly wanted for extensions.

4th Spare parts for (1) and (2) above.

5th Special apparatus and plant usually manufactured by only one firm.

6th Miscellaneous materials, such as bare copper wire, guy wire etc which can be purchased in the open marke

7th Miscellaneous materials which can be supplied by more than one manufacturer but manufactured to our own specification.

The latter two classes can be purchased through the London purchasing Agent Messrs. Jeremiah Lyon & Co while the first five items can best be purchased direct from the manufacturer.

In the case of the first five classes, purchases are always made under a definite guarantee and when purchased direct from the manufacturers, they themselves give free of charge the expert examination and inspection of their plant and correspond direct with us on any question as to the most suitable plant for our purpose. A certified copy of tests and examinations made before the plant is shipped is submitted to us by the manufacturers whenever we require them to do so.

The alternative to this is to engage an outside firm, who are experts in that particular class of plant, to make an expert examination and test and submit reports thereon to the purchaser for his approval before shipment is made. The fee for this charge amounts in some cases

cases 1 to 1½ per cent. of the cost of the plant.

In making purchases falling under the first five classes through a Purchasing Agent, it is absolutely necessary that the Purchasing Agent Himself supply the expert for testing and examining the plant, but where this provision is not made in the terms of the agreement - with the Purchasing Agent, the Purchaser has to bear the extra expense of such examinations and tests,which expense will approximately double the amount paid the Purchasing Agent.

Where plant is purchased direct from the manufacturer,the manufacturer himself is responsible for the plant,until it is in complete and successful operation and agrees to make good any defects or faults in materials or workmanship that they develop during a certain period of normal operation after installation.

A good illustration of this is, the top half casing of No.15 Turbine at Sivasamudram, which developed a fault during our tests has been replaced free of charge by the manufacturers.

The manufacturers, in supplying the original installation,do so in competition with other manufacturers and therefore give us their very lowest prices possible,while the supply of duplicate apparatus,though not in competition,is made direct to the Purchaser at as low a cost as they would give us through a Purchasing Agent, as they would, to certain extent, feel that the purchase of their plant is to a large extent obligatory.

In making purchases under both these conditions the commission paid to the Purchasing Agent would be an additional cost to us. to which must be added any charges for experts tests and examinations.

In the case of spare parts,where the apparatus is already installed it is self evident that the commission paid to a Commission Agent [redacted]

will be an additional cost, as the manufacturer knows it is absolutel obligatory on us to make pur purchases for such apparatus from him.

For the above reasons, I have the honor to recommend that I be specifically permitted, as provided for in the above Government Order to make purchases for the first five classes direct from the manufac turers, as has been the approved practice hitherto. Pending further orders of Government, I would also like to request permission to - place our orders direct with the Purchasing Agent for the materials falling under the last two classes.

Pending the completion of arrangements for the system of purchases, I might be permitted to conclude with the manufacturers and suppliers the purchases,which are now under negotiations.
